

CONSIGNMENT TRACKER:

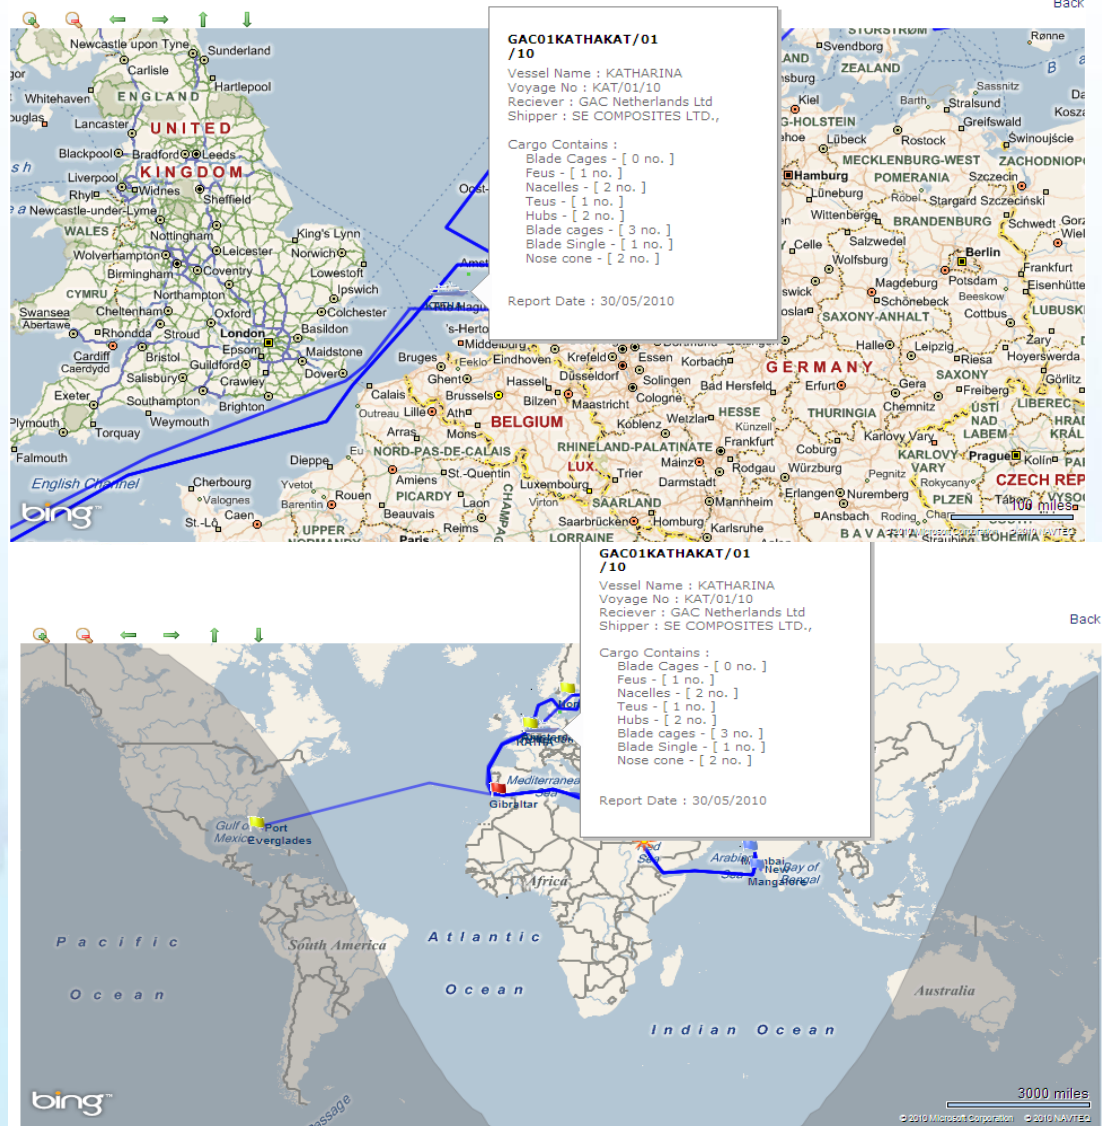

Consignment Tracker is an advanced software solution designed to track the cargo/consignments a vessel carries from loading point(s) to destination point(s). It covers the commercial and operational functionality needed for carrying out logistics activity. **IT IS A PART OF POST FIXTURE, BUT CAN ALSO BE USED AS STAND ALONE SOLUTION**

Technology:

- ❖ .Net
- ❖ SQL Database
- ❖ Web based app.

Benefits:

- ❖ Having Consignment Tracker gives an edge over tracking & answering customer queries regarding the cargo's location & delivery in a dynamic environment.
- ❖ Online methods ensure correct integration of all office database, guaranteeing 360 degree view for all users, whether in the vessel, main office, branch offices or field managers, share the same updated information.
- ❖ Integrated operational data like NOON/ARRIVAL/ANCHORAGE REPORT to better understand the cargo's movement.
