

POST-FIXTURE:

Post-Fixture is an advanced software solution designed to analyze the commercial viability of a voyage. It is a system covering the wide spectrum of commercial and operational functionality needed by a modern shipping company to calculate actual profit/loss for a voyage. It also helps in tracking consignments & monitoring vessels over a GIS based platform.

Post-Fixture is developed on Microsoft .NET Platform & is a part of the Integrated Business Solution for shipping industry. It is a full-featured web based application for tracking & maintaining of a voyage details & any cargo that is being transported.

Benefits:

- ❖ Having Post-Fixture gives an edge over keeping a track over voyage expenses & cargo in a competitive environment.
- ❖ Online methods ensure correct integration of all vessel & office data base, guaranteeing 360 degree view for all users, Whether in the main office, branch offices or field managers, share the same updated information.
- ❖ Extra features like consignment tracker & vessel monitor help taking quick & important decisions.
